**Votes in 5% tolerance**

A check within the data entry software ensured that any Referendum Center where more votes were cast than registrants recorded could not be processed, with a 5% tolerance level. All Referendum Centers which failed to pass this check were investigated.

The investigations into Referendum Center results conducted both within the Datacenter and in the field, established that all cases were the result of clerical variances.

As a result of the 5% threshold, and exceptional turnout across most centers, some centers appear to have more votes than registrants however all investigations conducted assure that this is a result of clerical variances.
